BUCKINGHAM TOWN COUNCIL

BIODIVERSITY POLICY

BACKGROUND

In accordance with the duty imposed on town and parish councils by Section 40 of the Natural Environment and Rural Communities Act 2006, updated by Section 102 of the Environment Act 2021, Buckingham Town Council (hereinafter referred to as the Council) which has any functions exercisable in relation to England must from time to time consider what action the authority can properly take, consistently with the proper exercise of its functions, to further the general biodiversity objective.

This duty also means that town and parish councils can spend funds in conserving biodiversity.

DEFINITION

According to Defra (Biodiversity 2020), biodiversity is the variety of all life on Earth. It includes all species of animals and plants – everything that is alive on our planet.

Biodiversity is important for its own sake and has its own intrinsic value. Several studies have shown this value also goes further. Biodiversity is the building block of our 'ecosystems' that in turn provide us with a wide range of goods and services that support our economic and social wellbeing. These include essentials such as food, fresh water and clean air, but also less obvious services such as protection from natural disasters, regulation of our climate, and purification of our water or pollination of our crops. Biodiversity also provides important cultural services, enriching our lives.

AIMS AND OBJECTIVES

The object of this policy is to work towards conserving and enhancing the biodiversity of the Council's area.

The Full Council and any Committees of the Council will consider sustainability, environmental impact and biodiversity when making decisions, and will develop and implement policies and strategies as required.

In particular, the Council will aim to improve the biodiversity of the area in the following ways:

- Consider the potential impact on biodiversity represented by planning applications.
- Manage its land and property using environmentally friendly practices that will promote biodiversity.
- Support local businesses and council operations in the adoption of low impact / nature.
- Encourage and support other organisations within the town to manage their areas of responsibility with biodiversity in mind.
- Support residents and local organisation activities to enhance and promote biodiversity.

ACTIONS

Planning Applications

The Council will:

- when commenting on planning applications, support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats;
- support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications;
- consider what each proposed development might make in terms of biodiversity net gain;
- include policies in support of biodiversity within the Neighbourhood Plan.

Land and property management.

The Council will:

- carry out a biodiversity audit of its landholdings;
- consider the conservation and promotion of local biodiversity regarding the management of its open spaces. This will include the consideration of beneficial practices with regarding to cutting and removal of vegetation, application of chemicals and timing of maintenance work, paying attention to the Government's regulations for plant protection products;
- consider sourcing sustainable materials when procuring supplies for the Council's use;
- consider biodiversity issues and the implementation of changes when managing its buildings.

Local community

The Council will:

- raise public awareness of biodiversity issues, including through its website and newsletters;
- engage with local businesses and residents regarding biodiversity in the community and how members of the community can assist and make a difference;
- where feasible, involve the community in biodiversity projects on its land including for example tree planting, wildflower meadows, birdbox installation.

Partners

The Council will work in partnership with other organisations to protect, promote and enhance biodiversity within the council area.

It will review any local nature recovery strategies and species conservation strategies and consider how it may become more involved in implementing the strategies' recommendations.

MONITORING

This policy was adopted by Full Council on **4th November 2024** (Minute **347/24**) for biennial review by the Environment Committee or as required by legislation. A summary of how the policy has been implemented will be brought back to the Environment Committee annually, with reference to the original biodiversity audit.
